In fear of the advertised worst storm Adelaide has ever known 11 cars and 18 brave souls gathered at Veale Gardens for our 9am start of the run to Murray Bridge. However; the day turned out to be magnificent with no rain, no wind and a sunny 19c all day (At least until the evening). The only iffy weather was at the turnoff to Hahndorf where we drove into some fog.

David & Kerry came in the "GS with the excuse that David took the forecast to mean that showers were due in the morning too, so he didn't prep the TD!

It was good to see newbie Charlie Rumbelow, and his mate and Club Member, Greg Stanford out for the Brekky Run in Charlie's MGB. This car sports a rather unusual hardtop on which Charlie had just done some re-sealing work at the front, so he had been hoping for rain in the morning in order to test out his work. This proves that you can't please everyone, some wanting rain and others not!

Great to also see Jane & Ian Harrison out for a first run in their blue MGF which they are loving, it being complete with heater and everything! Ian has re-joined the Club after a hiatus away from MGs, having previously owned TF1500 and MGA. He also has an MGB in the family stable. Ian is a very keen photographer and does lots of non-digital work with a "real" camera. He took many snaps on Sunday using black & white film where he can then print his own pix at home! We hope to see some of his shots at some stage.

The route took us up the freeway to Hahndorf, after which seven cars managed to stay in convoy thanks to steady driving by Ian Harrison whom we all followed. The drive was via Nairn, Kanmantoo and past Monarto arriving at Murray Bridge after driving some great quality "back" roads where the cars could stretch their legs. At Murray Bridge's Sturt Reserve, we found plenty of parking alongside the river, and could sit and watch the houseboats pass leisurely by.

A good run was had by all and thankfully there were no breakdowns.
